Objective

To become good much for your stuff on the position of junior HTML-coder/front-end developer. To improve my professional skills in this area and by being supervised by getting mentoring of experienced colleagues. I enjoy making test tasks.

Skills

- *I know HTML, SASS, CSS, JavaScript, SVG, Bootstrap, jQuery, BEM, Gulp, GIT, Avocode.*
- *English level **Elementary**.*
I continue learning English with my tutor.

Functional responsibilities

- *Page layout by means of PSD (Pixel Perfect).*
- *Adaptive and responsible design.*
- *Implementation JavaScript logic (slider, pop-up, animation, AJAX and the like.)*

Work experience

I haven't had an experience in frontend development.

From 2010 till now - I have been working in Orion-Toys company. This is the enterprise production of plastic toys for children. I work in a position of a designer and I'm in charge to design models of children toys.

Education

1999-2004 Odessa State Academy of Civil Engineering and Architecture (OSACEA), faculty "Industrial and civil engineering" (ICE)

Courses

2018 – IT school Hillel course **Front-end(basic)**

2018 - IT school Hillel course **Front-end(pro)**
